Chris/Monica,

I know we continue to report positively, but please keep in mind the product deactivating in the back yard is still extremely dangerous. The cold has been replaced by extremely high winds that make getting accurate air monitoring challenging.

Anthony,

Thanks for volunteering to do report out. Below are some bullets that we put together to assist.

- <!--[if !supportLists]-->• <!--[endif]-->EPA and TCEQ continue to be on scene
- <!--[if !supportLists]-->• <!--[endif]-->Amarillo PD is providing security
- <!--[if !supportLists]-->• <!--[endif]-->Air monitoring continues to show no threat beyond property
- <!--[if !supportLists]-->• <!--[endif]-->Warmer temps have improved the conditions for the cleanup
- <!--[if !supportLists]-->• <!--[endif]-->Once the house is cleared it, it will be turned over to law enforcement for investigation
- <!--[if !supportLists]-->• <!--[endif]-->TDA has been onsite

and TCEQ and EPA are providing assistance as needed. (FYI they asked us to look for cap to weevil-cide)

- EPA and TCEQ are working to finalize the sampling plan.
- Unified command is developing rehabilitation plan.
